

The Archive Scan

Our new **Archive Scan** service offers meticulous, high-resolution preservation of photographic film, slides and print originals. Each frame is carefully handled to ensure optimal preservation and quality. The process includes:

- Gentle surface cleaning using an anti-static cloth.
- Application of filtered compressed air to remove surface particles.
- Residual imperfections, such as baked-in or stubborn dust, may still be visible.

This scan is designed as a detailed preservation file, ideal for further enhancement through our advanced **Digital Cleaning**, **Restoration**, or **IPT** (Image Precision Technology) services.

This unique approach ensures your priceless assets are preserved in their truest form, with the flexibility for future enhancements.

Archive Scan Pricing

QTY	PRICE PER UNIT
1 - 250	\$10.00

Preserve and Protect with DFStudio

As a perfect compliment after your scans are completed, **DF Studio** offers a secure image cloud storage system that ensures your digitized archives remain safe for generations to come.

With DF Studio, all high-resolution digital scans are delivered securely via our cloud-based platform, ensuring easy access and reliable storage. Final project deliverables, including TIFF files of original assets, are made available to customers for 30 days after

Digitize your Assets, Archive for the Future

Film and prints from photographic archives are becoming increasingly susceptible to fading and decay. Scanning services for these types of assets have historically been either low quality or prohibitively expensive. DigitalFusion is resetting the standard for quality and price, now bringing large-volume, high-quality archive scanning within reach of collections worldwide. With over 25 years of experience, you can trust that you'll have the best quality in the market.

Digital Scan Finishing

Digital Cleaning

\$37.50 per 15 minutes

Enhance your archive scans with expert digital cleaning. Our team removes visible blemishes and spots, providing a pristine version of your assets for publishing or presentation.

Restoration

\$62.50 per 15 minutes

Bring your treasured visuals back to life with our digital restoration services. Using cutting-edge techniques, we repair damage, enhance color and contrast and restore your images to their original photographic authenticity.

IPT

\$112.50 per 15 minutes

Our proprietary **IPT (Image Precision Technology)** is a groundbreaking approach to image enhancement that uncovers lost details and restores your visuals to their fullest potential. Using advanced algorithms and meticulous craftsmanship, IPT uncovers lost details in faces and objects, and adds significant quality to blurry, low resolution, and faded images otherwise lost to time and decay. This modernization technique is the ultimate enhancement, propelling images to museum grade quality.

project completion. Customers can then seamlessly transition their files into a personal DFStudio account for long-term preservation and maintenance, protecting their valuable images against unforeseen events.
